BE UNIQUE. YOU ARE MORE  
THAN YOU THINK.

I have a strong understanding of frontend development based on experience utilizing various web/mobile tech stacks like JavaScript, TypeScript, React/React Native, and a sense of UI/UX. I'm passionate about delivering exceptional user experiences and take responsibility for building products based on solid modern architectural principles.

I was able to successfully launch several products (4 mobile and 3 web apps) in the market from start to finish, collectively reaching over 2 million users.

My diverse professional experiences in both Korea and the United States have nurtured a growth mindset, enabling me to embrace new perspectives and adapt the cultures and needs effectively.

Looking forward to contributing my knowledge and skills dedicated to meaningful opportunities.

Sincerely,

*Hyewon Joo*
